

Stelis BioSource™

# Global Presence Local Compliance

Access to global markets while being compliant with your local Biologic Drug Product regulatory requirements

**Stelis BioSource™** is a one-stop shop with comprehensive capabilities from Formulation Development through to scale up, cGMP manufacturing and fill/finish of proteins, vaccines, and peptides.

## SERVICES

Stelis BioSource™ is a one-stop solution for all your end-to-end biopharmaceutical manufacturing needs. Whether you are at an early stage of development or with a scale up ready process or need to manufacture product for commercial supply, we can support your needs. We are committed to offering CMO/CDMO services with a strong focus on speed, reliability and knowledge.

## OUR CAPABILITIES

Stelis Biosource™ cGMP Drug Product facility offers filling in all injectable formats including lyophilized forms. All filling lines for Prefilled Syringe, Cartridges, and Vials have integrated isolators to maintain continuous aseptic conditions during filling. The facility offers fully automatic packaging lines with labeler, syringe assembly, blistering and cartoning machines. We also have dedicated warehouse with cold chain management.

## Single Cycle Development Track:

- Preclinical to Commercial for Biologics
- Biologic Formulation Development
- Drug Product Manufacture
- Expandable Manufacture Platform
- Collaborative Working Relationships
- Simplified Product Lifecycle
- Vials, Prefilled Syringes, and Cartridges
- Lyophilization
